“The financial year 2016 was a good year for us. **Vistaar** entered in five new states and opened additional 68 Branches of which 95% of them are located in rural and semi-urban areas. In the years to come, these Branches will help the Company to explore new sectors and further penetrate into varied geographies. Thanks to our investors as well as the lenders that the Company has secured funds for its growth and we continue to seek their support going forward.

During the last financial year **Vistaar** had won three awards in different categories –
